

MASCOT

(whitepaper)

Introduction

Luck is an important part of people's lives. Historically, people in the real world can have their own talismans that can bring good luck, warn of danger, and improve well-being. Our team of crypto-enthusiasts decides that members of the Cardano ecosystem should also be able to have their own talisman in the metaverse.

What is MASCOT?

MASCOT TOKEN is a native asset on the Cardano blockchain. You can purchase it and keep it in your wallet to attract good luck. We are planning to release various collections of NTF tokens that visualize different unique talismans for everyone. Only MASCOT tokens can be used to acquire MASCOT NFTs.

Our mission

The mascot team has several missions to fulfill, we add more goals in the future

- Support Cardano network as a future of DeFi
- Spread Cardano NFTs as a wallet talisman
- Develop the games based on the properties of talismans
- Create real-world talismans based on MASCOT NFTs
